Fabric Collection: Luxor

The “Luxor” collection combines the appeal, durability and ease of cleaning of **leather**, with **fully machine washable** sherpa/fleece cushions.

“The Luxury of Leather”

Why Leather?

The durability of fine leather means that it stands up to the rigors of daily life, requires minimal care, offers extraordinary beauty, has a rich distinctive aroma, and gives outstanding value for money.

The benefits of a “Luxor” leather dog bed:

1. Resistance to tearing, and puncturing.
2. Good heat insulation. Leather contains a great deal of air, which is a poor conductor of heat. This is an important comfort consideration. Leather remains warm in winter and cool in summer.
3. Resistance to fire. Leather is naturally fire retardant, and is also treated so that it resists heat and flames.
4. Resistance to fungi. Leather is made resistant to mildew, etc. by the incorporation of very small amounts of suitable fungicides.

“Real” Leather?

Real leather is a natural product: it breathes, is warm and has individual characteristics, which make each hide unique. Leather will always bear the marks of its natural origin and these characteristics can show as healed scars, neck growth marks, and areas of differing fiber density and hair pore structure.

These hallmarks in no way detract from the wearing qualities of your “Luxor” leather dog bed; they are signs discerning owners cherish when buying a “Real” leather product.

Shade Variation:

No two hides are alike and due to the varying grain structure the dyes and finishes penetrate to differing degrees in parts of the hide to give an attractive variation. While every attempt is made to achieve uniformity, this is not always possible. Swatches or samples, therefore, should be regarded as no more than a guide to the color.

**Care and Maintenance:**

It is essential to the life of your "Luxor" dog bed, that it should be cleaned regularly, and at the same time, an accumulation of dirt and grease over a period of time is not only undesirable but obviously the longer it is left, the more difficult it will be to remove.

Regular cleaning of your "Luxor" dog bed, can be done simply, by using a damp cloth, taking care not to soak the leather as this could damage it. Modern leathers are not required to be "fed" and therefore the temptation to apply saddle soap or wax polishes should be avoided. Spray polishes should be avoided at all costs as these contain silicone, and after a period of time will produce a sticky surface

It is vital that any cleaning fluid that does not state that it can be used on leather should not be used. Many of these cleaners have a high alkaline content and can be particularly harmful. It is also important that the methods for cleaning shoe leather do not apply to your "Luxor" leather dog bed, and therefore wax polishes should be avoided.

Fabric Collection: Caress

The "Caress" collection features a fully machine washable microfiber velvet with a soft, luxurious touch, yet exceptionally hard wearing. It is offered either "all-over", combined with a "Comfort" upholstery grade fabric or with our sherpa/fleece. All combinations are fully machine washable!

"So Soft and Luxurious"

A first, from In The Lap Of Luxury™, dog beds made from "Caress", a very unique fabric that has the look and feel of suede. It is so soft and luxurious, that you are instantly drawn to it. While you'll agree that "Caress" is irresistibly soft, the uniqueness of this fabric lies within its performance. Exceptional wearability, resistance to staining, and ease of cleaning are just a few of the notable characteristics of "Caress".

"Caress" is produced with state-of-the-art technology using ultra-fine polyester microfibers (many times finer than silk) that are woven into a fabric that is soft and pliant, yet unusually strong, making it a superior upholstery fabric. The "Caress" ultra microfiber is laminated to a softly brushed, cotton (70%), polyester (30%) backing for additional body and strength.

Quality tests carried out in an ISO9002 accredited laboratory have proven that "Caress" also offers high resistance to wear.

Care and Maintenance:

1. Avoid exposure to direct sunlight
2. Remove any dust or dry stains with a vacuum cleaner and soft brush attachment every 10 days.
3. To preserve the beauty of "Caress", it is advisable to treat any stains before they become too ingrained so that the abrasive and prolonged treatments are avoided.

Beds with removable covers:

All removable covers can be machine washed separately using the cold or warm water setting on a delicate cycle.

1. Use a mild detergent that does not contain any bleach of any sort.
2. Do not pour the detergent directly onto the material.
3. Spin dry, or tumble dry at the lowest possible setting.
4. Do not twist or wring.

Prompt attention is advisable as soon as the fabric has been stained. In the case of difficult or unusual stains, expert advice should be sought. "Caress" can also be professionally dry-cleaned

Note: Caress may shrink if tumble dried at a warm setting.

Beds with fixed/non removable covers:

When it is not possible to remove the cover, observe the following cleaning procedures:

1. Remove light stains or dirt, and brush with a suede brush.
2. Dab stubborn stains with a soft, clean white cloth or absorbent paper towel.
3. If solvents are required, avoid applying them directly onto the stain; the solvent should be poured onto a clean cloth and any type of treatment should be first tried on a concealed part of the bed.
4. Clean the stain using a circular motion working from the outside inwards.
5. After removing the stain, dry immediately with a hand held hairdryer using a cool setting. Take care to direct the air stream first towards the outside of the area working inwards.
6. Always be careful to rub any stains gently and to use a brush with soft bristles.

Water Soluble Stains:

Wash with a neutral soap (such as Neutrogena) and water solution, then dab with diluted alcohol (90:10) or you may use a 50:50 solution of water and white vinegar. Excessive rubbing is not necessary or advised, a blotting action is recommended. Remove excess soap or vinegar by dabbing clean water with a clean cloth.

Oil Based Stains:

Dab with turpentine sparingly, using a soft, clean, white cloth. Once the stain has been removed, blot again with a dry cloth to remove any residue chemicals or liquids. Never use acetone or other nail polish removers.

Fabric Collection: Stanford

The "Stanford" collection features fully machine washable upholstery grade 100% cotton twill fabrics. The options and combinations available are "Stanford all-over", and "Stanford with Sherpa/Fleece", but the combination may be design dependant; so please check the ordering option on the design you choose. All combinations are fully machine washable! all colors apart from natural will bleed initially.

STANFORD

"Premium Upholstery Fabrics"

In The Lap Of Luxury™ introduce the "Stanford" range of premium quality pet beds made from a wide selection of upholstery grade fabrics.

All of our fabrics including the "Stanford", coordinate with the Fleece/Sherpa for the cushion. "Caress" and all of the "Stanford" upholstery grade fabrics, can also be produced "All-Over", where the cushion is made from the same fabric.

Every "Stanford" fabric meets the California Bureau of Home Furnishings flammability requirements, giving you peace of mind.

Care and Maintenance:

1. Avoid exposure to direct sunlight
2. Remove any dust or dry stains with a vacuum cleaner and soft brush attachment every 10 days.
3. To preserve the beauty of an "Comfort" fabric, it is advisable to treat any stains before they become too ingrained so that the abrasive and prolonged treatments are avoided.

Beds with removable covers:

All removable covers can be machine washed separately using the cool water setting on a delicate cycle.

1. Use a mild detergent that does not contain any bleach of any sort.
2. Do not pour the detergent directly onto the material.
3. Spin or tumble dry at a cool setting. On the fabrics that are not pre-shrunk there may be a slight amount of shrinkage on the first wash. It is advisable in all cases, to use the coolest settings possible.
4. Do not twist or wring.

Prompt attention is advisable as soon as the fabric has been stained. In the case of difficult or unusual stains, expert advice should be sought. All "Comfort" fabrics can also be professionally dry-cleaned.

Beds with fixed/non removable covers:

When it is not possible to remove the cover, observe the following cleaning procedures:

1. Remove light stains or dirt, and brush with a soft suede brush.
2. Dab stubborn stains with a soft, clean white cloth or absorbent paper towel.
3. If solvents are required, avoid applying them directly onto the stain; the solvent should be poured onto a clean cloth and any type of treatment should be first tried on a concealed part of the bed.
4. Clean the stain using a circular motion working from the outside inwards.
5. After removing the stain, dry immediately with a hand held hairdryer using a cool setting. Take care to direct the air stream first towards the outside of the area working inwards.
6. Always be careful to rub any stains gently and to use a brush with soft bristles.

Water Soluble Stains:

Wash with a neutral soap (such as Neutrogena) and water solution, then dab with diluted alcohol (90:10) or you may use a 50:50 solution of water and white vinegar. Excessive rubbing is not necessary or advised, a blotting action is recommended. Remove excess soap or vinegar by dabbing clean water with a clean cloth.

Oil Based Stains:

Dab with turpentine sparingly, using a soft, clean, white cloth. Once the stain has been removed, blot again with a dry cloth to remove any residue chemicals or liquids. Never use acetone or other nail polish removers.

Fabric Collection: SantaFe

The "SantaFe" collection features a 100% cotton rugged fully machine washable 14oz denim, with a soft touch, yet with the wearability of a pair of jeans. It is offered either "all-over", or with our sherpa/fleece. All combinations are fully machine washable! this is NOT pre-washed, so wash separately. A "woof and ready" product!

"Premium Upholstery Fabrics"

In The Lap Of Luxury™ introduce the "SantaFe" range of premium quality pet beds made from a wide selection of upholstery grade fabrics.

All of our fabrics including the "SantaFe", coordinate with the Fleece/Sherpa for the cushion. "Caress" and all of the " SantaFe " upholstery grade fabrics, can also be produced "All-Over", where the cushion is made from the same fabric.

Every "Stanford" fabric meets the California Bureau of Home Furnishings flammability requirements, giving you peace of mind.

Care and Maintenance:

1. Avoid exposure to direct sunlight
